DESCRIPTION:
SFC-308L is a rutile flux cored tubular wire for all-positional welding using pure CO2 or Argon CO2 mixed shielding gas. It performs with smooth arc transfer, self-releasing slag, low spatter level, fine ripple and good intergranular corrosion resistance.

APPLICATIONS:
Suitable for welding 18%Cr-8%Ni stainless steels. Typical applications include corrosion resistance overlay, joining of common austenitic stainless steel types 301, 302, 304, 304L, stabilised 321, CF-8 and CF-3.

NOTE ON USAGE:
1. Use DC (+) polarity.
2. Maintain a higher welding speed in order to get enough penetration in the down hand welding position.
