DESCRIPTION:
SFC-309L is a rutile flux cored tubular wire for all-positional welding using pure CO2 or Argon CO2 mixed shielding gas. It performs with smooth arc transfer, low spatter level, fine ripple, fast freezing slag, easy control of weld pool and good hot crack resistance.

APPLICATIONS:
Suitable for welding dissimilar metals such as ferritic and austenitic stainless steels, as well as for joining ferritic martensitic steels. It is also used for buffer layers of clad steels.

NOTE ON USAGE:
1. Use DC (+) polarity.
2. Maintain a higher welding speed in order to get enough penetration in the down hand welding position.
